

Worksheet 3 – JavaScript

1. Create a new page called rollover.html
2. Copy the contents of your faq.html page to your new page.
3. In the head section, add the following code:

```
<script language="javascript">
  function MouseRollover(MyImage) {
    MyImage.src = "images/red.gif";
  }
  function MouseOut(MyImage) {
    MyImage.src = "images/blue.gif";
  }
</script>
```

4. In the body section, add the following code:

```
<div align="center">
<!--The rollover image displays here.-->
<h1>Rollover effect</h1>

</div>
```

5. Copy the two images on the wiki and place them in the images folder.
6. Run your page in a browser and observe what happens when you move the mouse over the image.
